COMMENT	RESPONSE
<p>Retrieved from (b) (6) 5 Dec 17. Complaint: The caller had two concerns regarding the Puloa Range, Ewa Beach. 1.) He said signs are posted stating that the range opens at 0700, but shooting began a few minutes prior to the time. The safety brief was given at approximately 0630 and could be heard near the residence. 2.) He said firing continued through the playing of colors without pausing. The caller said he understood the need for training, but wondered how difficult it would be to wait until after colors to start the range.</p>	<p>Spoke with the caller and explained that the safety instruction started at that time to maximize day light on the range. I relayed the concerns to the Range team.</p>
<p>Retrieved from SDO E-LOG 20171217 The caller said noise from the range loud speaker could be heard before 0700. He said he called the police and would go to the next neighborhood meeting to complain.</p>	<p>COMREL spoke with the caller and explained that the training is for required annual qualifications.</p>

Retrieved from KBAZ_COMMSTRAT@usmc.mil, 19 Dec 17, 7:46 a.m. Complaint: This is getting old and my patience are wearing thin. If I were to get out a megaphone and start yelling at 0630 everyday, I'd be arrested. This range is located literally between two residential areas. A little respect for the residents would go a long way toward Goodwill between all parties. I have made numerous calls to the duty officer when the peace has been disturbed prior to 0700 to no avail. Today, however, was the first time I encountered outright rudeness and hostility from a duty officer. When I called this morning and informed the duty officer that I'd like him to call the range and tell them to cease operations until 0700, (b) (6) rudely snapped that "...you don't just get to call up here and tell me what to do". That's where the exchange became combative. I do not ever recall encountering a Marine--especially a CWO-- with so little discipline. A duty officer represents the command, and must be prepared to field calls from people who might be unhappy that they have been awakened during quiet hours relentlessly. I've spoken to public affairs as recently as yesterday and nothing changes. Everyday right around 0630-0640, the range boss commences to bark out his range brief on a very loud amplified sound system. From our end, this seems like an avoidable disturbance, especially when on most days, the gunfire seems to be complete by around 0900. A true desire to not create a regular disturbance and persistent nuisance could be demonstrated by a tangible adjustment to timing of these regular disturbances. I have a deep respect for the USMC and the requirements for training. A bit of reciprocal respect for the peace in our neighborhood in the dawn hours would also be appreciated.

Retrieved from (b) (6) 20 Dec 17, 6:52 a.m. Message: Hi this is for (b) (6) (b) (6) This is (b) (6) My battery died. We got cut off and I did have some actual questions. When you have an opportunity I would appreciate a short call. Thanks very much..

<p>Retrieved from KBAZ_COMMSTRAT@usmc.mil, 20 Dec 17, 6:47 a.m. Complaint: Yet another morning awakened by non-essential amplified noise. The lack of any effort to actually adjust what is being done to accommodate the community that supports you is disturbing. The necessity for the range brief to be conducted via loudspeaker is BS. How about showing a little consideration for the citizens.</p>	
<p>Retrieved from KBAZ_COMMSTRAT@usmc.mil, 20 Dec 17, 7:05 a.m. Complaint: Yet another morning awakened by non-essential amplified noise a half hour prior to range hours and during civil quiet hours. The lack of any effort to actually adjust what is being done to accommodate the community that supports you is disturbing. The range brief need not be artificially amplified on a loudspeaker. How about showing a little consideration for the citizens and letting those of us who you disturb DAILY have a bit of a break by conducting your range brief off-mic. PLEASE!</p>	
<p>Retrieved from KBAZ_COMMSTRAT@usmc.mil, 21 Dec 17, 7:40 a.m. Complaint: Did you turn up the volume to intentionally annoy those who have expressed displeasure with your unnecessary noise during civil quiet hours? On Monday, my conversation with (b) (6) was cut off due to my phone battery dying. I called back, left a message stating that I had more questions and requested a callback. That was three days ago. The USMC is not fostering Goodwill with the community by continuing to ignore requests to stop disturbing the peace in a civilian community during civil quiet hours. In fact, the impression is that they are purposefully being louder.</p>	<p>COMREL Spoke with (b) (6) about his re-occurring complaint about the rifle range. He claimed the noise from the loudspeaker is louder than he has heard before. I explained that the range has the volume as low as possible and still be able to provide safety instructions. He asked why can't the instructions be read without the use of the loudspeaker. I explained that the shooter may have hearing protection on and that the priority was to ensure they had the proper safety instructions before using the range. I also informed (b) (6) that the base does not want to be a bad neighbor, but the priority is to make sure the Marines are ready and have their qualifications. I explained that watchstanders aren't trying to be difficult with callers, but that their priority is the safety and security of the base and when someone calls asking them to change an operation that is a requirement, they are going to push-back. I told him the proper way to share his concern is through the noise concern line.</p>

Detailed Comments	Hello, I'm a (b) (6) I don't have a noise complaint, I would just like to find out what hours the firing range at MCB Hawaii Puloa Oahu is active. Want to ensure I'm disclosing the correct information to any potential homebuyers along Ewa Beach near the base. Aloha, (b) (6)
